## 6.1 Channel Stereo Surround Receiver

### RCV-650A

#### Features

Speco Technologies enters the home surround sound receiver market with Dolby and DTS home theater surround sound expertise at our side. The new RCV-650A is a 6.1 Surround Sound amplifier that furnishes the end-user with their personal choice of Dolby Digital, Dolby Digital Surround EX, DTS, DTS 96/24, DTS ES Discrete and Matrix, DTS Neo:6 Cinema and Music and Dolby Pro Logic II for maximum entertainment enjoyment.

With 8 DSP modes and AM/FM tuner with 64 presets and memory, this receiver features a full range of inputs including 7 analog inputs, 3 audio digital inputs (including 1 optical and 2 coaxial), 4 S-video inputs, 4 composite video inputs and 2 component video inputs.

Complimenting outputs include 1 subwoofer line level output, 1 stereo audio output, 1 S-video output, 1 video composite output and 1 video component output.

With accompanying easy-labeled remote control and corresponding labeled rear inputs on the unit the 50 watts-per-channel RCV-650A will offer years of leisurely or high-adrenaline entertainment.
